

## SPECIFICATION:

Max working pressure: 250bar

Flow max: see performant chart
Internal leakage: 3 drops/min / 210bar

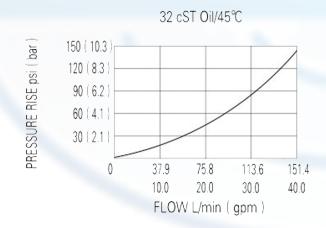

Filtration of oil: 25m or better Temperature:  $-30 \sim +110$ °c

Cavity: 16 - 2

Installatin: 65 ~ 70Nm Coil rating: 85% ~110%

Continuous from 85% to 110% of rated voltage

## PERFORMANCE

When de-energized, the valve blocks flow in both directions.

when energized, allowing flow from 2 to 1 and 1 to 2.
